Cutting-Edge Threat Prevention, All Inclusive

CHECK POINT™

INTRODUCTION

Cyberattacks have become a major concern across various industries and businesses as the threat landscape has increased exponentially. In 2021 alone, cyberattacks against corporate networks have increased by 50% year-over-year, and this trend is expected to accelerate in 2022.

Covid has left company security perimeters fragmented, forcing employees to work remotely on various devices. In addition, corporate applications and data have been shifted to third-party cloud solutions, requiring a new security architecture. Threat actors have stepped up by turning the recent turmoil to their advantage by improving their attack velocity, intensity, and complexity, hence the cost of a security breach skyrocketed.

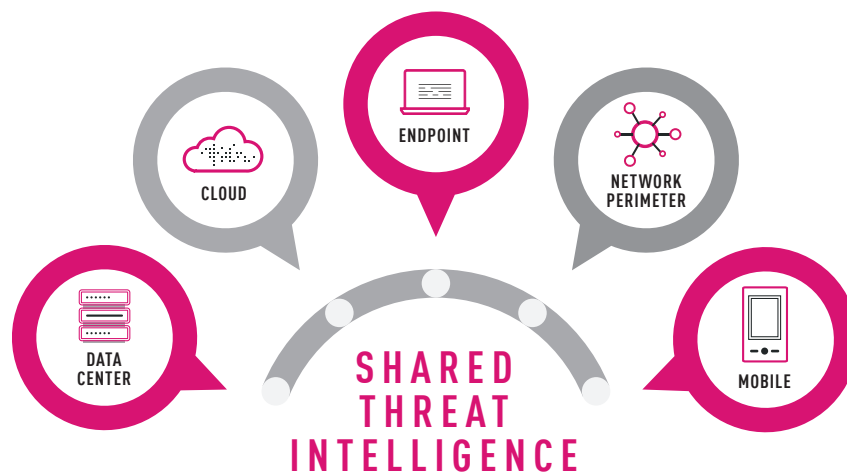

In this new reality, security teams struggle to defend organizations against increasing waves of cyber threats including ransomware, phishing, and supply chain attacks. As a result of the Log4J vulnerability, millions of companies were exposed, including Cisco, Amazon, and Tesla. More than ever, companies need to make sure their hybrid workforce is protected, as well as their corporate applications, which require enhanced security across user access, mobile, networks, IoT, and Cloud environments.

Check Point Infinity consolidated architecture offers cybersecurity peace of mind to companies. By focusing on threat prevention and leveraging globally shared intelligence on known and unknown cyber-threats, the Infinity Enterprise License Agreement (ELA) offers a complete, preventive, and efficient security solution for the workforce, network, cloud, mobile, and IoT.

BENEFITS

- The most advanced real-time threat prevention against the latest generation of cyber-attacks.
- All inclusive: hardware, software, subscriptions, and 24/7 support
- Single procurement and predictable spend
- Real-time security updates via ThreatCloud
- Unified management from a single pane of glass.

CONSOLIDATED MANAGEMENT

REALTIME THREAT PREVENTION TECHNOLOGIES

ENTERPRISE LICENSE AGREEMENT

INFINITY ENTERPRISE LICENSE AGREEMENT

Check Point Infinity Enterprise License Agreement delivers the broadest set of security products and technologies to protect organizations in real time against the latest generations of multi-vector cyber-attacks across their network, endpoint, mobile, IoT, and cloud.

Tailored made solutions across industries, verticals and company sizes, Infinity Enterprise License Agreement enables you to consume the security products and associated services you need, in an annual subscription model that includes:

- **Real-time Threat Prevention:** Protection against APTs and unknown zero day malware, using real-time sandboxing; ransomware protection; and anti-bot technologies, powered by integrated, real-time cloud-based threat intelligence and machine learning for identifying new threats.
- **Advanced Network Security:** The most advanced firewall, intrusion prevention and application control, supporting networks of any size—from branch offices to global enterprises, and across both private and public cloud security offerings.
- **Cloud Security:** Advanced threat prevention security in public, private and hybrid cloud, and SDN environments, with micro-segmentation for east-west traffic control inside the cloud.
- **Mobile Security:** Malware prevention on iOS and Android mobile devices, rogue network identification, secure containers, data protection and document encryption, and EMM integration.
- **IoT Security:** Identifies any IoT device on the network and assesses its risk, prevents unauthorized access to and from IoT devices with zero-trust segmentation, blocks IoT malicious intents with industry leading threat prevention security services.
- **Data Protection:** Anti-ransomware for known and unknown ransomware, data protection and seamless document encryption, browser security, a fully integrated endpoint protection suite and security forensics.
- **Integrated Security & Threat Management:** A unified security management environment supporting multi-device, multi-domain and multi-admin management, with complete threat visibility supporting collection, correlation and attack analysis, and reporting tools for compliance and audit.
- **Security Services:** Real-time security updates (ThreatCloud), software updates, hardware maintenance, 24x7 support and maintenance, and optional training classes, on-site professional service, consulting workshops, security checkups and incident response (based on selected package).

In summary, Check Point Infinity Enterprise License Agreement future-proofs your security infrastructure by providing end-to-end coverage across all attack vectors.

Get the protection you need, prevent the next critical attack.
